

Creoptix AG is an emerging company located in Wädenswil near Zurich. Our biosensor instruments are used in life science research labs within academic and industry, providing biochemists with the best tools to explore new applications in the field of molecular interaction analysis. Our products are praised for their most intuitive user interface, and we would like to keep it that way.

That is why we are looking for you as

C#.NET/WPF Desktop Application Developer

Your role and responsibilities

In this role, you will work in an interdisciplinary team of biochemists and hardware engineers to continuously improve our software used for designing, conducting and analyzing biochemical experiments. You will be developing in C#.NET/WPF for Windows with Visual Studio, more specifically

- Enhancing our device control and analysis software with ever more useful features with a smart UI and robust underlying code
- Writing unit and integration tests for your own code and performing enough manual testing to ensure the product works when we say it does
- Collaborating with the application team who is working productively with the software, using Youtrack and regular meetings in an Agile workflow
- Being in charge of Git version control and release scheduling

What we expect

- You are independent, smart and a fast learner
- You have proven experience in C#.NET (>=C#6) WPF UI development and MVVM pattern
- You apply best practices in Object oriented design
- You are familiar with Generics/delegates, Events, Exception handling, Functional design patterns (LINQ Method Syntax)
- You are familiar with Git and Agile workflows
- Optionally, you are experienced in Telerik/SciChart or similar GUI and charting libraries, Vectorized computations, XML serialization, ASPOSE.NET
- You care about code quality, and you are fluent in English

What we offer

- An exciting, challenging, innovative and open environment: you will work with other smart people in an interdisciplinary team and broaden your horizons
- Flexibility for part or full time (80-100%), partial home office possible
