## **Creoptix to support the 15th Annual Drug Discovery Summit in Geneva**

Creoptix AG today announced the participation in the 15th Annual Drug Discovery Summit to be held in Geneva, Switzerland, June 2 & 3, 2014.

Supporting this conference allows Creoptix to present its innovative system for label-free analysis of molecular interactions by waveguide-interferometry technology. The system is characterized by highest sensitivity addressing the demanding needs of the drug discovery industry, such as improved fragment-based screening, binding analysis at low concentrations or accurate analysis of slow dissociation kinetics. Smart disposable sensor chips having integrated micro-fluidics and the user friendly software provide a reliable, high performance yet economic solutions to the industry.

If you want to learn more, please contact us at [info@creoptix.com](mailto:info@creoptix.com) or stop by at our booth at the conference.

We look forward to meeting you soon.

Creoptix AG, Einsiedlerstrasse 25, 8820 Wädenswil, Switzerland
